Squire 'Extra' (SQE) ***Keg Washing, Sanitizing & Filling Systems***

The IDD Semi-Automatic Keg Washing, Sanitizing and Filling System
For Sankey - Single Valve Kegs (SVK's)

The Squire series of keg washing, sanitizing and filling systems are the standard by which all other semi-automatic systems are measured within the worlds craft brewing industry. With more than 400 of these systems installed worldwide in Brewpubs, Micro-Breweries, Cideries and Wineries, the Squire 'Extra' is the ideal system for Brewpubs processing up to 50 kegs per week.

SQE is also for those who want to wash, sanitize, purge and counter-pressurize their kegs with CO₂/N₂ for storage and alternative filling methods.

- **Monitors & Controls** the process sequence via infrared sensor and PLC computer that the washing, sanitizing (sterilizing) and filling of kegs is completed correctly to ensure product integrity is protected.
- **Separate wash and fill heads** – Allows two kegs at a time to be processed.
- **Separate sanitizer and caustic dosing** - Affords proper control over flow rate, chemical dosing.
- **Wash for stock** – Washes, sterilizes and charges kegs with CO₂ for long term storage.
- **Dual wash programs** – A programmed selection of washing, sanitizing and filling options for different sized kegs and/or unfiltered products.
- **UL/CUL** certified electrical systems
