Squire “Plus 2” Keg Washing, Sanitizing & Filling

The IDD semi-automatic keg washing, sanitizing and filling system for Sankey – Single Valve Kegs (SVK’s)

The Squire ‘Plus 2’ (SQP2) is the standard by which all other semi-automatic systems are measured within the world’s beverage industries. With more than 400 of these systems installed worldwide in Brewpubs, Micro-Breweries, Cideries and Wineries, they are the ideal system for 25 to 30 kegs per hour output.

The SQP2 is for those who want to wash, sanitize, purge, counter-pressurize and fill their Sankey style kegs two at a time, (one washing, one filling at the same time).

- **Monitors & Controls** - Via infrared sensors and PLC computer software that the washing, sanitizing (sterilizing) and filling of kegs is completed correctly to ensure product integrity is protected.
- **Separate wash and fill heads** – Allows two kegs at a time to be processed.
- **Separate detergent tank** - Affords proper control over flow rate, temperature and chemical dosing.
- **Available Options:**
 - Fill by Weight
 - Locking Wheels
 - “Double Doser”
- **UL/CUL** certified electrical systems

Squire “Plus 2” (SQP2) with “Fill by Weight” option
