Squire "Plus Washer" ***Keg Washing, Sanitizing & Filling System***

The IDD Semi-Automatic Keg Washing and Sanitizing System
For Sankey - Single Valve Kegs (SVK's)

The Squire 'Plus Washer' (SQPW) is a member of the standard by which all other semi-automatic systems are measured within the world's craft brewing industry. With more than 400 of these systems installed worldwide in Brewpubs, Micro-Breweries, Cideries and Wineries, they are the ideal system for 25 to 30 kegs per hour output.

The SQPW is for those who want to wash, sanitize, purge and counter-pressurize their kegs with CO₂/N₂ for storage and alternative filling methods.

- **Monitors & Controls** the process sequence via infrared sensor and PLC computer software to ensure product integrity
- **Separate detergent tank** - Affords proper control over flow rate, temperature and chemical dosing.
- **Separate in-line** proportional metering system for sanitizer dosing
- **Wash for stock** – Washes, sterilizes and charges kegs with CO₂ for long term storage.
- **Dual wash programs** – A programmed selection of washing and sanitizing options for different sized kegs and/or unfiltered products.
- **UL/CUL** certified electrical systems
